Subject: RE: eCycling International Permit Inquiry

Hi,

We never received an updated construction permit reflecting the unit being subject to HMIWI, and as such a permit was never issued. We did have several discussions with the facility, and they did indicate that they were struggling with meeting the regulatory requirements.

Please, let me know if you need additional information.

Thanks,

Veronica

Hi Veronica,

Hope you are doing well. I was wondering if you received a complete application after the package the facility sent in 2014 or if its permit was finalized. We have a similar facility in South Coast that may be subject to the HMIWI standards as well.

Thanks,
Roshni

Subject: eCycling International Permit Inquiry

Good morning Roshni,

The first permit application we received from eCycling International requested coverage under our Registration Permit for Fuel Combustion (see attachment). Coverage was granted under the registration permit in 2012 for two (2) boilers that were previously operated by another manufacturing entity.

A construction permit application was submitted in 2014 for the addition of a medical waste destruction facility at the existing location. As part of our review of the application package, an applicability determination was requested from US EPA Region 4. The proposed unit was determined to be a combustion unit not a pyrolysis unit. We deemed the application incomplete and requested that a new application be submitted if the applicant chose to proceed with the proposed project.

Any additional questions on the combustion unit may be directed to Veronica Barringer by email at barrinv@dhec.sc.gov or by phone at 803-898-4127.
